Jessie M. Roberson
Acting Assistant Manager for
Environmental Restoration
DOE, RFO

NO FURTHER ACTION RECOMMENDATION FOR OPERABLE UNIT (OU) 15 – SGS-125-94

The purpose of this correspondence is to recommend that no further action be taken at OU 15 based on the results of OU 15 Stage I and II field work inside buildings. The results of OU 15 Stage I and II field work inside buildings are presented within the Phase I [Resource Conservation and Recovery Act (RCRA)] Facility Investigation/Remedial Investigation (RFI/RI) Work Plan Draft Technical Memorandum (TM) 1 for OU 15. TM 1 was transmitted to the Department of Energy, Rocky Flats Office (DOE, RFO) on February 22, 1994.

An exception to the No Further Action is Individual Hazardous Substance Site (IHSS) 204, the Original Uranium Chip Roaster, which is still active. A Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) decision document may have to be prepared in the future to close IHSS 204 with respect to CERCLA. However, IHSS 204 may be closed with respect to RCRA at this time. Additionally, EG&G Rocky Flats, Inc. recommends changing the requirements for the Phase I RFI/RI Report for OU 15 to a No Further Action Justification document to facilitate and accelerate closure of OU 15 as an OU at Rocky Flats Plant.

If you have questions regarding this correspondence, please contact Dennis Schubbe of Remediation Project Management at telephone extension 8709.
